Local transport

We are located on the outskirts of the city centre towards Armley. Taxi's are available in the city centre and the bus routes running through the city centre are 42, 72, 4, 75, 55, 4F, 16, 15, 55C, 16A and 508 and drops off at Wellington Bridge. This follows an 8 minute walk from the bus stop to the venue.

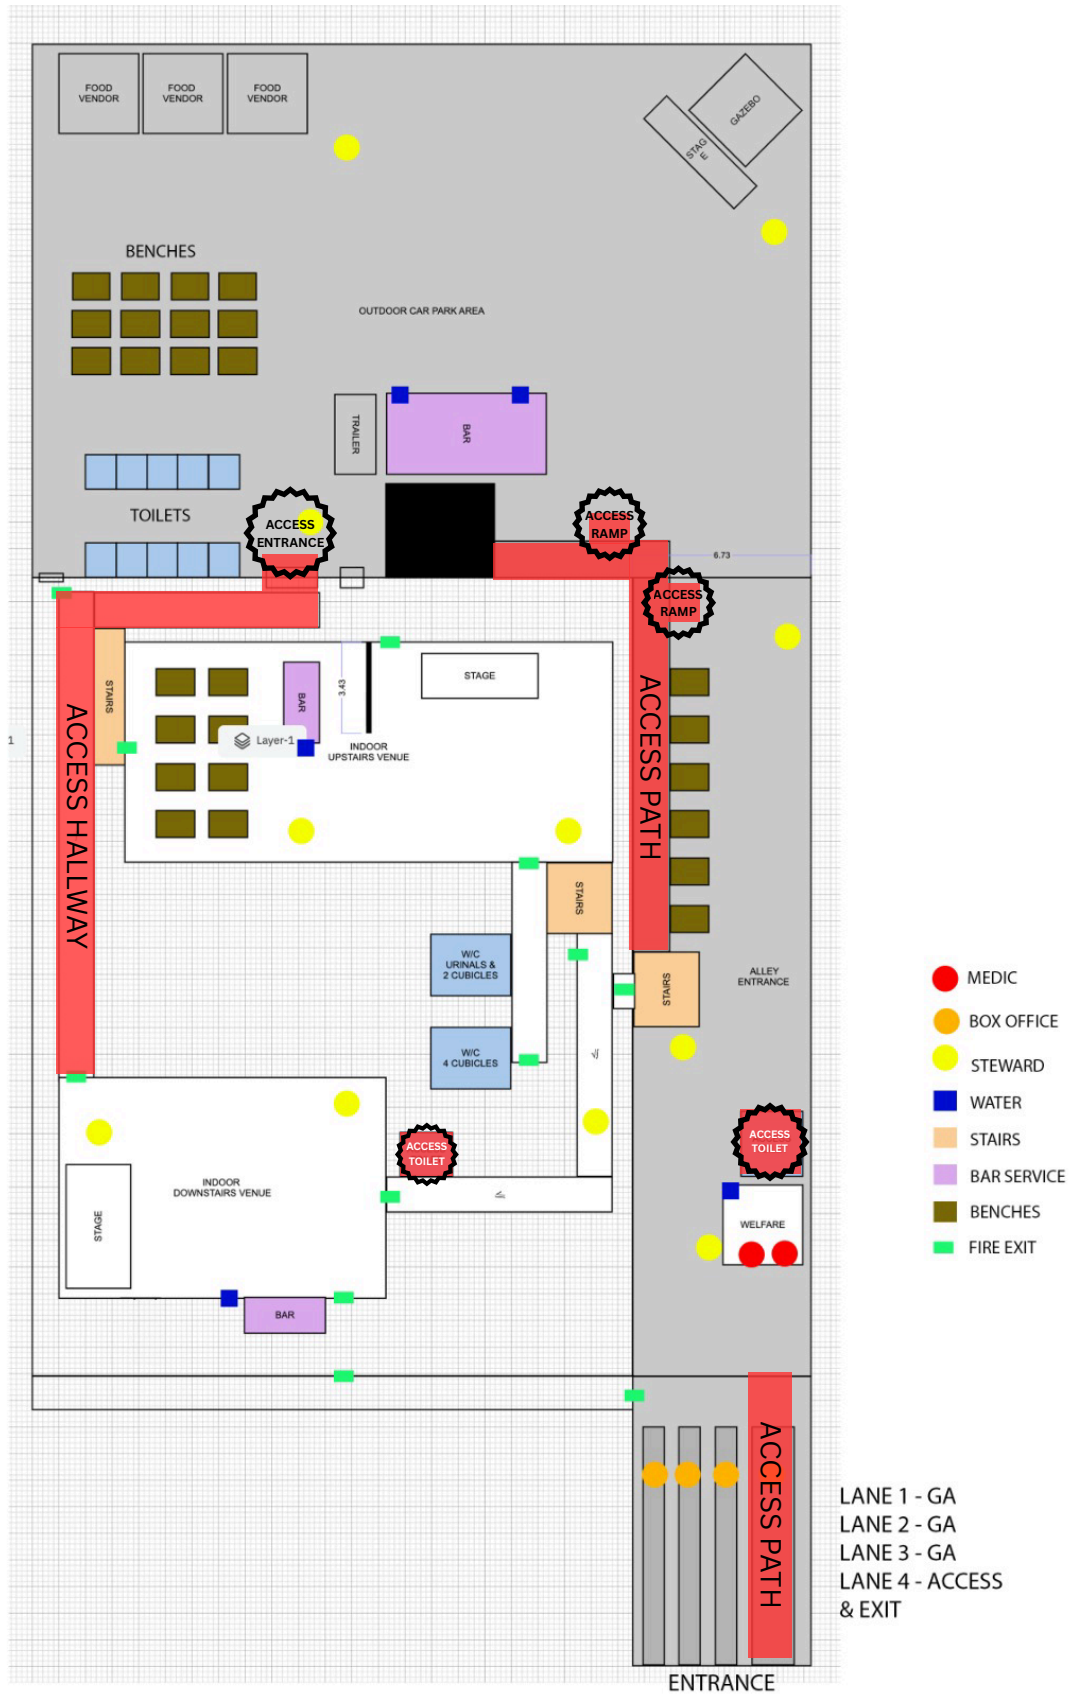

By car

Unfortunately we don't have parking spaces available but the closest parking to the venue is West Street Carpark, which is an 8 minute walk to the venue. We advise to travel by pre-booking a taxi for ease of the journey.

To get to the front of the venue, follow the path along the road, follow it around in front of Canal Place to the end of the carpark and on your left is the entrance into the venue's outside entrance.

Map of the venue

Entrances

There will be main entrance into the venue area located at the front from the street with an accessible lane on the far right of the entrance. There are hand rails at the main door entrance of the building.

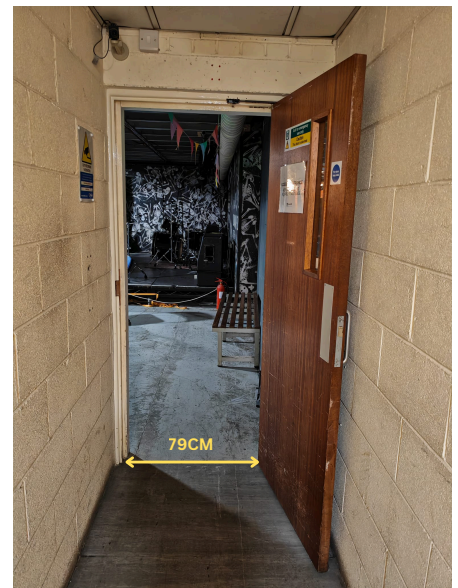

Front Door

At the main front door to the inside of the venue, both double doors can be opened upon request and there are three steps directly in front and to the right of the main front door. This includes handrails that can be used for access if able and enters into the foyer before the inside bar area.

Accessible entrance

The accessible entrance to the building is located at the back left of the venue between the temporary bar and temporary toilets. This is also the fire exit.

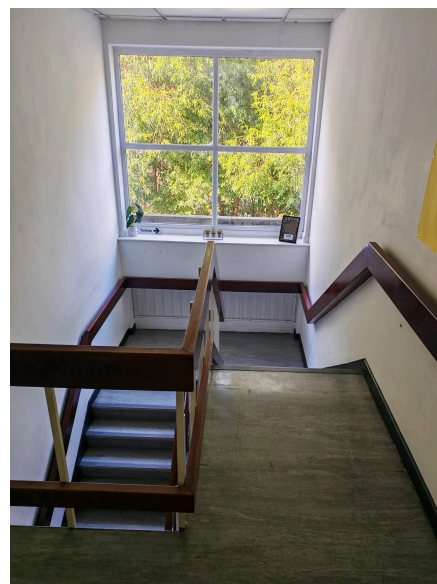

Layout and seating

There will be two accessible ramps on both sides of the path to be able to navigate around the crowd at busier periods of the event. These ramps have anti-slip pattern and can withstand over 250kg.

Stairs inside

Outside event space

All of our outside area is flat concrete. This will consist of benches that are not fixed and can be moved if necessary.

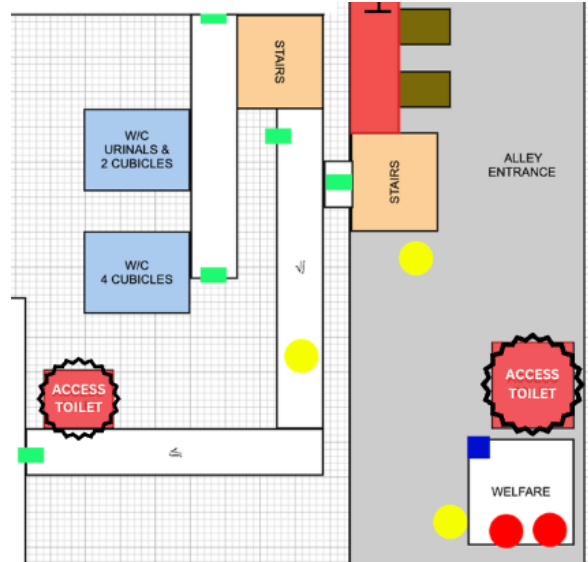

Inside event space

All lower floor area's inside the venue is flat concrete surface. We also have cushioned stable metal chairs if required.

Accessible toilets

There will be a temporary access toilet next to the welfare tent near the entrance of the venue. We also have a permanent access toilet inside the venue following through the access hallway, through the bar before the foyer. There are also toilets upstairs available.

Lighting

There will be LEDs, fairy lights, hazer machines throughout inside and outside of the venue but consider inside the venue to be dark. The access hallway will be visibly lit for your safety.

Noise

As we are next to a busy main road the noises are primarily from traffic which aren't usually heard from inside the venue space. In and around the venue will be quite loud, wearing ear plugs is recommended and we also have some available at the bars.

Extra support

If there's anything that hasn't been covered that you need to require about before the event, feel free to get in touch. During the event, staff in high-vis on site can direct you to someone that can support you and we will do what we can to make your experience as comfortable as possible.
